Projects

Student Management System(College minor project I)

- **Description:** Developed a comprehensive Student Management System to streamline student records and administrative tasks.
- **Technologies Used:** PHP for backend development, MySQL for database management, HTML, CSS, and JavaScript for the frontend.
- **Key Features:** Enabled functionalities such as student registration, record management, and real-time updates. Implemented robust data handling and user interface elements to enhance usability and efficiency.

Second-Hand Items E-commerce App (College Minor Project II)

- **Description:** Developed a full-featured e-commerce application focused on buying and selling second-hand items, offering a user-friendly platform for individuals to trade used goods seamlessly.
- **Technologies Used:** Flutter and Dart for cross-platform mobile app development, PHP for backend APIs, and MySQL for database management.

Key Features:

- User authentication and profile management
- Product listing with images, descriptions, and pricing
- Admin panel for product and user moderation
- Add-to-cart functionality
- Secure and efficient backend APIs for data handling

Trainings Attended:

- Attended a comprehensive workshop covering foundational aspects of HTML, CSS, PHP, and JavaScript.
- Attended an intensive workshop focused on building cross-platform mobile applications using Flutter.

Language:

- Nepali
- English
- Hindi
